But after talking to Stern about it, Kalens had accepted that an attempt

to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borftein later. "A visible commitment to lawfulness as a alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borftein had -agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space..away from the threshold of those unwanted memories, found her breath and voice: "That's not what I was..blood of others was the staff of life..And Micky said to Leilani, "Did he kill your brother, Lukipela?". "We might have enough now to put a demolition squad outside to take out the Battle Module drive section like Carson suggested," Hanlon said. "Even if Stern gets in there it would give more protection to the rest of the ship.".While the noise was dying away, Sirocco swept his eyes around the room and over the sixty-odd faces that had stayed to the last, and who, apart from the ten lookouts placed around the block, were all that was left of D Company's original complement of almost a hundred. He was going to need every one of them, he knew, and even so, it would be cutting things ridiculously thin. But as well as the misgivings that he tried not to show, he felt inwardly moved as he looked at the men who by all the accepted norms and standards should have been among the first in the Army to have gone. But apart from the SD units, D Company's record was second to none. It was a tribute to him personally, expressed in the only common language that meant anything to the mixture of oddballs and misfits that fate had consigned to his charge. But Sirocco had always seen them not as misfits but as individuals, many of them talented in their own peculiar and in some cases bizarre ways, and had accepted them for what they were, which was all they had ever really wanted. But the term misfit was a relative one, he had come to realize. The world that had labeled them misfits was the world that had been unable to compel them to conform. Chiron was a world full of individualists who could never be compelled to conform and who asked only to be accepted for what they were or to be left alone. Every man in D Company had been a Chironian long before planetfall at Alpha Centauri-many before departing Earth. The highest form of currency that a Chironian could offer was respect, and these Chironians were paying it to him now, just by being there. Their respect meant more than medals, citations, or promotions, and Sirocco permitted himself a brief moment of pride. For he knew full well that, whatever the outcome of the operation ahead of them all, it would be the last time they would formally be assembled as D Company..Stanislau and two others, moving carefully and making use of cover since they were now in a part of the complex that was being used, headed for the storeroom near the front foyer of the Communications Center to join Hanlon's group, which by now should have been swollen by the arrival of Celia, Malloy, and Fuller; Sirocco took three more to where another group was assembling near the approaches to the rear lobby; and Bernard with his toolbox strolled away casually on his own toward the corridor that connected the Communications Center to the main entrance of the complex..anger, and so she drank now in the service of Leilani..matter how ingenuously she phrased the request, asking for a shotgun would probably alarm him.. "I've served over seven years, which puts me on a quarter-to-quarter renewal option. Therefore I owe you a maximum of three months. Okay, I'm giving it. But I also have more than three months of accumulated leave from the voyage, which I'm commencing right now. You'll have that confirmed in writing within five minutes." He stood up and walked to the door. "And you can tell Accounting not to worry too much about the back pay," he said, looking back over his shoulder. "Yes, I knew I was in danger, but that was secondary," Celia told them. "I still can expose the lie. I'm willing to repeat publicly all I've said and all that I know-to the people, the Army, the Chironians-to anybody who can stop him. The system that gives people like Stern what they want drove my husband mad and then sacrificed him. There must be no more sacrifices. That was why I had to get away.".snake-gnawed face and her snake-chomped nose.. "How are they going -to pay you?" Jay asked..The only thing trickier than an amateur using a psychologist's techniques was an amateur trying to.Sirocco had devised a plan for getting the Company up to the ship and into the Communications Center, but it hinged on Stanislau's being able to alter the orders posted for the day, which were derived from schedules held in one of the military logistics computers. Lechat, who was standing nearby with Celia and Colman, had called for a test-run to make sure that Stanislau could do- it, since if that part of the scheme didn't work none of the rest could. Sirocco had suspended the briefing to resolve the issue there and then..of the painful past on which her life was built. "They'll find a way," he said..Bernard looked out again and shook his head. "Not until that ship up there is disarmed somehow." After a pause he turned to face her again. "So it doesn't scare you anymore, huh?".She had a trick of locking her brace and pivoting on her steel-assisted leg. Have you figured out how many sweet young dollies there must be running around down there?" Sirocco chuckled lasciviously over the intercom. "I bet Swyley has a miraculous recovery between now and when we go into orbit." Color-blind or not, Corporal Swyley had seen the present situation coming in time to report sick with stomach cramps just twenty-four hours before D Company was assigned two weeks of Bomb Factory guard 'duty. He was "sick" because he had reported them during his own time; reporting stomach cramps during the Army's time was diagnosed as malingering..ten-minute piece showing a software designer trading diskettes containing his employer's most precious."Of course not," Rastus said. "Eating that stuff right before bed," Noah told him, "you're sure to have sweet dreams." "of derring-do. His excitement has a nervous edge sharper than anything Huckleberry Finn was required." "Never say you don't get anything back for your taxes." Colman was sitting next to her, grinning faintly in the brief glow as one of the others lit a cigarette. But she had gone for so much of the day without speaking that she was unable to answer immediately. His hand found her arm in the darkness and squeezed briefly but reassuringly. "It'll be okay," he murmured. "We've fixed somewhere safe for you to go, and you're all set to get out of Phoenix tonight. I'll be coming with you into Franklin?". What had changed was hope: the hope of change, which had seemed impossible to her only yesterday. Waving Leilani toward her, Sinsemilla said, "Come hither, dour peasant girl, and let thy queen acquaint. Ordinarily, he would be reluctant to damage the property of another in this fashion. But serial killers." "That frightens you?". "Because the Book tells us we must." "tongue stuck to the roof of her mouth.. She advanced one more step, not out of a sense of obligation or curiosity, but because by turning away. Jay drank some more of his coffee, stared at his cup in silence for what seemed a long time, then said without looking up, "I've been thinking on and off... you know, I think I'd like to get into the Army. What would be the best way of going about it?". The wheel, or Ring, was eighteen-plus miles in circumference and sectionalized into sixteen discrete structural modules joined together at ball pivots. Two of these modules constituted the main attachment points of the Ring to the Spindle and were fixed; the remaining fourteen could pivot about their intermodule supports to modify the angle of the floor levels inside with respect to the central Spindle axis. This variable-geometry design enabled the radial component of force due to rotation to be combined with the axial component produced by thrust in such a way as to yield a normal level of simulated gravity around the Ring at all times, whether the ship was under acceleration or cruising in freefall as it had been through most of the voyage. "Right. The other-yes, question?". "I've talked to shrinks. They're all crazy. How do they know whether I know me or not? Do you know how your head works inside?" Anita shook it in a way that said she didn't care all that much either. Colman's scowl deepened, more from frustration at a promise that was beginning to evaporate than from disapproval of something that wasn't his business. "Then how do you expect a pill to figure it out?". A call came through from Brigade, and Sirocco switched into the audio channel to take it. Colman sat back and looked around. The indicators and alarms on the console in front of him had nothing to report. Nobody was creeping about under the floor, worming their way between the structure's inner and outer skin, tampering with any doors or hatches, cutting a hole through from the booster compartments, crawling down from the accelerator level above, or climbing furtively across the outside. Nobody, it seemed, wanted any thermonuclear warheads today. He rose and moved round behind the chair. "Need to stretch my legs," he said as Sirocco glanced up behind his faceplate. "It's time to do a round anyhow." Sirocco nodded and carried on talking inside his helmet. Colman shouldered his M32 and left the guardroom.. area along the shoulder of the road. Forest all around. He said we'd go on to a motor-home park later. Falls left the monitor room, crossed the floor of the Drive Control Subcenter, and exited through sliding double doors into a brightly lit corridor. An elevator took him up two levels to another corridor, and minutes later he was being shown into an office that opened onto one side of the Engineering Command Deck. Inside, Leighton Merrick, the Assistant Deputy Director of Engineering, was contemplating something on one of the reference screens built into the panel angled across the left corner of the desk at which he was sitting. "Well, I--I can't pretend to know anything about that side of things, sir."
