Eve Verity elaborated. "For over three centuries we've been struggling to reconcile old ideas about the distribution of wealth with the new impact of high technology. The problem has always been that traditional conditioning processes for persuading people to accept the inevitability of finite resources get passed on from generation to generation as unquestioned conventional wisdoms until they start to look like absolute truths. Wealth was always something that had to be competed and fought for. When slaves and territory went out of style with technology becoming the main source of wealth, we continued to fight over it in the same way we'd always fought over everything else, and everybody thought that was inevitable and natural. They couldn't separate the old theories from the new facts." Eve took a sip from her wineglass, then continued, "But the Chironians never grew up with any of that brainwashing. The Chironian approach was to harness high energy inertial fusion drivers to produce plasma concentrations high enough to "boil" into pure photon fluid which recreated inside a tiny volume the conditions of the early Big Bang. Within this region, space and time recoupled and contracted inward with the imploding core to simulate for an instant the bizarre, inverted conditions of an antiuniverse, and in that instant a large portion of the tweedles liberated in the process transformed into antitweedles which, under the prevailing high-energy conditions, combined preferentially into antiquarks and antileptons rather than radiation. Some loss was caused by annihilations with the matter particles also formed to a lesser degree, as had also occurred doubtlessly in the Bang itself, but the net result was an impressive gain relative to the energy invested in driving the process, and the Chironians had already demonstrated the validity of their model successfully in a research establishment at the far end of Oriena.."The what?".be dead for sure.
