And today, your own time to get this specific guide since among the compromises has become ready. "You can use a gun, can't you, Jay?" Murphy asked. "Well, yes, but..." Jay looked taken aback...If warehouse decor favored red light, as reputed, then this atmosphere was holier suited to a prostitute. figures back into the shattered cupola and helping, them climb to the entrance into the feeder ramp. "L 'think this." Mrs. D," Leilani said to Geneva, "that creepy rosebush of yours just made obscene gestures at me." Jay Falls thought for a moment that he was going to throw up and tried to shut out the soundtrack as he sat nibbling at the remains of his lunch. An astronomy book lay propped open on the table in front of him. Behind him his mother and his twelve-year-old sister, Marie, were digesting the message in silent reverence. The page he was looking at showed the northern constellations of stars as they appeared from Earth. They looked much as they did from the Mayflower 11, except in the book Cassiopeia was missing a star--the Sun. On the page opposite, the Southern Cross included Alpha Centauri as one of its 'pointers, whereas from the ship it had separated and grown into a brilliant orb-- shining in the foreground. And the view from Earth didn't show Proxima Centauri at all--a feeble red dwarf Of less than a ten-thousandth the Sun's luminosity and invisible without a telescope, but now quite close to and easily seen from the Mayflower II. Always imperceptible from one day to the next and practically so from month to month, the changes in the stars were happening ever more slowly as the main drive continued to fire and steadily ate up the velocity that had carried the ship across four light-years of space...inexpressibly melancholy, so quiet that the lament drifted to Micky as might the voice of a real ghost: the Noah stopped, dismayed. "Which one?" Nobody talked any more about annexing Franklin. Howard Kalens's chances of being elected to perpetuate the farce plummeted to as near zero as made no difference, and Paul Lechat, recognizing what he saw as a preview of the inevitable, dropped his insistence for a repeat performance in Iberia; at least, that was the reason he offered publicly. Ironically, the Integrationist, Ramisson, emerged as the only candidate with a platform likely to attract a majority view, but that was merely in theory because his potential supporters had a tendency to evaporate as soon as they were converted. But it was becoming obvious as the election date approached that serious interest was receding toward the vanishing point, and even the campaign speeches turned into halfhearted rituals being performed largely, as their deliverers knew, for the benefit of bored studio technicians and indifferent cameras...morsel on his tongue, as though puzzled by the texture or the taste, warily tested the edibility of the. "Isn't that a Hawaiian name?" Micky asked...the most devout priest was serious about his faith... "Serial killers," he whispers to Old Yeller. Serial killers. This concept is too complex for the dog to. Colman ignored the remark. "Just think about it," he muttered. "For your own sake..." once more. He dare not call undue attention to himself, not with so many murderous hunters looking for there's no relief in even one voice among them? only shirk anxiety, urgency, wariness... As she negotiated the fallen pickets and crossed the neglected sun-browned lawn next door, the faint. "But we don't even know which Chironians to talk to," Lechat pointed out... The soft knock wasn't opportunity, but Micky said, "Come in..." Stormbel relayed the order, and the huge bulk of the Battle Module began sliding from between the Mayflower II's ramscoop support pillars as its auxiliary maneuvering engines fired. The sound of twisted steel scraping across the outside of its hull reverberated throughout the modules stern section as one of the feeder ramps, none of which was retracted, first bent, and then crumpled. The ramp tore open halfway along its length at a section that had been pressurized, spilling men and equipment out into space. The lucky ones--the ones who were wearing suits--could hope to be located through the distress-band transmissions from their packs. The others had no time to hope in the instant before their bodies exploded... Talking to Jay had brought to the surface a lot of things that Colman usually preferred not to think about. Life was like the Army: It took people and broke them into little pieces, and then put the pieces back together again the way it wanted. Except it did it with their minds. It took kids' minds while they were plastic and paralyzed them by telling them they were stupid, confused them with people who were supposed to know everything better than they did but wouldn't tell them anything, and terrified them with a God who loved everybody. Then it drilled them and trained them until the only things that made sense were those it told them to think. The system had turned Anita into a doll, and it was trying to turn Jay into a puppet just as it had turned Bernard into a puppet. It turned people into recording machines that words went into and came out of again . and made them think they knew everything about a planet full of people they'd never seen, just as it blew black guys' brains out because they wanted to run their farms and didn't want their kids nailed to walls, and then told the civilians in Cape Town it was okay. And what had it done to Colman? He didn't know because he didn't know how else it might have been... Bernard noticed several young girls who couldn't have been much more than Marie's age wheeling or carrying babies, before he registered with a jolt that the babies were probably their own. Mixed with the shock of the realization came a twinge of relief that he had left lean and Marie at home. Explaining this was going to require some delicate handling. And the way Jay was eyeing the Chironian girls Spelled more trouble in store farther along the line. In some ways, looking back, the simple and orderly pattern of life aboard the Mayflower II had had its advantages, he was beginning to realize... "I'm sorry, sir. He just went down to the lock..." news chopper or even a corporate-executive eggbeater with comfortable seating for eight, but huge and... "And having to rely on the news trickling through from the outside wouldn't help," Adam pointed out. "There have been so many rumors already. It would be more likely to just fizzle out..." CHAPTER TWENTY-ONE. safer in the dark... strictly followed in all life-and-death matters. Because he had committed himself to healing Leilani one. the landscape ahead of them with light, hoping to spot an obviously trampled clump of weeds or deep. Huddled in the hostile night, he hears himself making miserable sounds. His mother always told him that. spell, it resists his muscle and his mind... "Yes, it is," he replied. There was nothing more to say... potential wound... "Jay!" Jean exclaimed. "Did you find anywhere nice? -What are those things?" "With a friend in Baltimore," she told hint, thus making her capitulation total. She needn't have, she knew, but something compelling inside her wanted that. She knew also that it was Stern's way of forcing her to admit it to herself. The terms were now understood... "That's what you want, isn't it," Jean said with a hint of accusation in her voice. "You'd like us to be the way they are. But have you really thought about what that would mean? No standards, no order to anything, no morality. . . I mean, what kind of a way would that be for Jay and Marie to grow up?'. be making light of the subject if I were actually being molested." She opened the cabinet door under the. He wondered how he might have made out if he'd had a start like that. And what would a guy like Colman be doing, who knew more about the Mayflower II's machines than haft the echelon-four shot-noses put together? If that was the way the computers had brought the first kids up, Driscoll reflected, he could think of a few humans who ~ could have. used some lessons... Lechat looked at them for a few seconds longer, then sat up and mustered a grin. "Well, what can I say? Good luck. She advanced one more step, not out of a sense of obligation or curiosity, but because by turning away. She'd better get a fix on the creature while it was stunned. She backed away, dropped
